

How to use AIRMobil New Text Messaging Service

Through Cellit's service, inquiring leasers and buyers of AIR properties can send a text message containing a short word to a special 5-digit phone number (30364), which is advertised on the property's sign. Within seconds, the inquirer will receive pertinent property information, including price, square footage, electrical capacity, and more directly to their phone. The Listing Brokers (up to four) then immediately receives the inquirer's phone number to his email account for a follow-up.

The Data will be updated every Monday and only available for listings submitted by AIR Members.

Below is an example what you need to add on your sign and also what the inquiring party will see on his cell phone.
